

RECENT CUSTOMER TESTIMONIALS

*We took delivery of our Circulation Booster last November. My wife Ann has **M.S.** and I suffer from **chronic angina**. We are **delighted with the results** so far. We use the equipment most days. Ann is getting **increased mobility** in her left arm by using the pads also and gentle improvement in **overall mobility** with a feeling of wellbeing using the foot pads.*

*Common with Angina sufferers, I have had problems with **ankle swelling**. The initial response to treatment by the foot pads has been **quite remarkable**. The swellings have greatly reduced together with the discomfort! I am also using the pads for muscular aches and wastage due to advancing years (85)! Again the results are **most encouraging** especially as we have only had two months or so use-to-date.*

Ted Milligan, Somerset

I bought The Circulation Booster because for the past 5 years I have suffered from **swollen ankles** and they have got considerably worse over the last few months.

However I had only been using the booster for just over a week - every night for 30 minutes and for the first time in 5 years I have **no swollen ankles** and I have noticed a **marked improvement** in the soreness and tenderness I used to have.

I am really pleased- I read about it in a magazine in the dentists and I am so pleased I invested; I was a bit concerned because of the price if I was wasting my money. But I have tried everything else so thought it was worth a try

Lynn Birt, Northants

*I suffer from **diabetes** and I have difficulty in moving for me walking was **extremely painful**, till my husband purchased the circulation booster for me. I started using it for half hour a day and although I am restricted to movement I have seen **an improvement in my mobility** and if I don't use it every day walking is extremely difficult. **I would be totally lost without it.***

Zubeda Delawala, London

Having suffered from **type 2 diabetes** for 41 years I have all the complications including **neuropathy**. The Circulation Booster was bought by myself in 2005 to help alleviate the discomfort caused by the neuropathy in my legs. I was very sceptical.

However after only a few sessions I began to have **less stabbing pains** was able to **walk with more vigour**. Also when using the machine before bedtime a much better nights sleep was had. **Circulation has improved** and generally I have a sense of well being.

My wife now uses the machine to de stress!

Colin Taylor, Derby

RECENT CUSTOMER TESTIMONIALS

*I have been using the circulation booster twice a week for one month. I have been suffering from **mild restless leg syndrome** at night, since using the machine my legs seem to be more restful, which in turn aids my sleep. I have also started using the pads around my body and have found it to have **a detoxifying effect**. I am very encouraged by the results.*

AM Gilbert, Buckinghamshire

I have enjoyed using The Circulation Booster on myself. I suffer from **lactic acid build up** in the calf muscles and half an hour on the machine relieves it for several days.

J.E. Henson, Chesterfield

*I purchased the machine for my wife who has **serious knee problems**, lots of pain and inability to walk too far. Since using the machine her knees have **improved greatly** and she is back playing golf.*

*I also use it and find it **stimulates** the lymphatic glands and makes the calf muscles jump; this can only be **good for blood circulation**. Long haul airlines should have one at every seat to avoid **DVT (Deep vein thrombosis)**.*

Jack R Russell, Glasgow

In using circulation booster I have gained the following benefits, as I work in retail I am always on my feet just by simply using it for half hour a day I have found it **very relaxing** and I have also seen an **improvement in my IBS**. My eating and diets habits have not changed so I put it down to the use of the circulation booster. I would recommend it to anybody.

Abeda Hanslod, London

*Peter suffered a **severe stroke** in June 2002 and spent a long time in a rehabilitation unit. He is 69 years old; full of determination to overcome his disabilities and he uses his Circulation Booster daily. He has problems with **foot and leg cramps** at night which causes a **lack of sleep**. The foot pads have given him **a lot of relief** and he is now getting a **good night's sleep**. The Electrode Pads are **proving invaluable** in him gaining mobility to his fingers and especially his disabled right arm. He is getting relief from his 'pins and needles'.*

RECENT CUSTOMER TESTIMONIALS

I purchased this product after discussions with your staff to **alleviate swelling of my ankles and feet**. This problem arose after I was attacked and injured quite badly in both legs. These injuries severely **damaged the lymph system** to my legs and my doctor is convinced that this has caused the **Oedema** that I now suffer. I have been taking a diuretic daily to control the swelling but this does not prevent swelling especially if I am on my feet for long periods.

Since using The Circulation Booster I have noticed a **considerable improvement** in my legs to the extent that I have **dispensed with the daily diuretic tablets**. I have increased the intensity of the treatment as my body became better conditioned and find that the half hour treatments are truly beneficial for my condition.

My doctor is equally impressed with the results which he believes are due to the stimulation given to muscles, reflexes and lymph's. I couple these treatments with walking exercises which appear to complement the treatment effects. **I am delighted** that I made the decision to purchase this equipment last year and **compliment you and your medical team** on the design and effectiveness of your product.

Gwynneth Flower, London

*I am happy to report an **improvement in blood circulation** and a **significant reduction of pain** in my **arthritic knees** since using the Electro-Reflexologist.*

*The pain I was experiencing required regular medication of co-codamol which also **helped alleviate pain in my hips**. However, since using your wonderful instrument I have **steadily reduced my intake of pain killing drugs** and currently need none at all!*

I can not speak too highly of the benefits derived from using The Circulation Booster daily for 30 minutes. Each time I use it, I make it an occasion, sitting in my favourite chair, listening to my favourite CD and enjoying a glass of red wine! 30 minutes of sheer indulgence which is working wonders for me!

J Stratton, Walsall

Since purchasing The Circulation Booster last year, I have had **truly amazing results**. I have suffered for many years with **RSI (Repetitive Strain Injury)** and 'Tennis Elbow'. I use a computer everyday for my work and have been in **pain for years**. I have always had difficulty positioning my hands and wrists over the keyboard comfortably. I started **using the electrode pads** on my elbow and on the backs of my wrist for 30 minutes, three times a week. At first I didn't notice much difference, but now **I cannot remember the last time I had any pain!** I have not experienced any restrictive movement in either of my wrists, and **no pain or discomfort whatsoever** in my elbow! I am even **back to my fitness training** for the first time in about 5 years.

Thanks High Tech Health, for a truly amazing product.

Terry Drew, Surrey

RECENT CUSTOMER TESTIMONIALS

With regard to The Circulation Booster we purchased from you I have found it **invaluable** in the treatment of **my feet and legs**, walking was a chore due to **bad circulation** but since using The Circulation Booster my walking **has improved considerably**, recently I had a pain in my neck and shoulder after suffering for a few days and sleepless nights I used the Booster a few times and the pain has gradually passed.

My husband who also suffers from **shoulder trouble** (about 2 years) has also used the machine and has **derived great benefit** from it.

We would both like to thank you for introducing us to your fine product
Mrs. E. Drummond, Nottingham

*My mother bought me The Circulation Booster **I haven't looked back since**. I use it every day when I get in from work as it really **helps me to unwind**. Now that I've been using it for a couple of months my whole body tingles when I use it and I love it. I'm generally feeling happier and I have **started losing weight** after months of struggling with it. I have also had a really **bad upper back** in the last few weeks and have used the electrode pads on it once a day for 30 minutes and it really is **feeling much better**. The pain disappears almost completely for a few hours and then after that is present but not too bad.*

*My lodger has had **a knee operation** and was very low after being told that it was going to take much longer to get better than he thought. He then started using my machine every day and is now, 3 months later, completely recovered.*

*My other half also has **a bad back** - 2 cracked discs - and he regularly uses it for the pain and it **helps him immensely**. In other words The Circulation Booster is a real hit - We love it!
Sara Bewes, Hampshire*

I was impressed the first time I tried the Circulation Booster and my elderly Mother has been using the machine with **fantastic results**.

Last year my Mother was diagnosed with **Sjogren's syndrome**, which is associated with **Rheumatoid Arthritis** and related to other conditions like **Raynaud's disease**. The medical profession think this is due to side effects of radiotherapy during cancer treatment.

These conditions have given my Mother discomfort and restless legs during the night. However, since using the Circulation Booster alternate evenings, at 8pm for approx. ½ hour, No. 19 frequency, her **condition has improved** and she is able to have a good night's sleep. We hope this helps others with similar symptoms.

Mrs M Choppin, Huddersfield
